DOG WASTE — TIDY TAILS

Action Required

⚠ **Execution Gap:** 107 commercial leads sitting in the database. ZERO calls made. This is Easter weekend — apartment managers are in the office Monday. Jamie has 3 hrs/week. **Time to use them.**

TODAY'S PRIORITY TASKS

● Commercial Outreach — Jamie Makes 3 Calls Monday

Hot 10 call playbook is ready. Scripts are built. Targeting apartment complexes + HOAs in North County where TJ has ZERO competition. Every call is ~\$200-400/month in recurring revenue.

⚡ URGENT

● Deploy /spring, /calculator, /commercial Pages

These 3 high-value pages are BUILT but invisible on the live site — they return the homepage. ~30 min to push to Cloudflare. Without this, spring SEO traffic goes nowhere.

⚡ TJ MUST DO

● Easter Weekend FB Groups

Easter = dogs are out, yards get messy, families are over. Perfect posting window. "Before the Easter egg hunt, let's talk about the other stuff in your yard..." — Franklin can prep 3 posts right now.

FRANKLIN CAN DRAFT

● 5 Directory Submissions (~45 min)

Citation tracker is ready. Bing Places, Apple Maps, Nextdoor Business, Angi, Thumbtack. Off-page SEO is still an F. Each listing = a backlink + visibility in a new search channel.

● Launch \$7/Day Facebook Ads

Full campaign kit is built. GBP is near-complete, 6 reviews at 5.0★. Foundation is solid enough. At \$7/day targeting STL County dog owners, ads pay for themselves with 1 signup.

READY TO LAUNCH

● GA4 + Gmail Alias Still Missing

Can't track conversions without GA4. Can't look professional without a @tidytailsstl.com email. Both are 30-min tasks that have been on the list for weeks.

LOW PRIORITY BUT LINGERING

PIPELINE — WHAT'S WORKING

- › **Facebook groups** = only proven organic channel so far. Keep posting.
- › **Google Maps** is near-eligible — 6 reviews at 5.0★ is Map Pack territory
- › **North County** has ZERO competition — highest-value expansion target
- › **Kirkwood + Webster Groves** — 15,500+ dog-owning households on I-44 Corridor
- › Current Monday scooping route is working. Route optimization = next growth unlock.

SHEDS — TUFFSHED / WOODMASTER

Scraped Live

CURRENT TUFFSHED.COM PROMOTIONS (SCRAPED TODAY)

💰 Service Finance — As Low As 9.99% Fixed APR for 120 Months

Loans up to \$100,000 · 10% down required · Can include concrete costs · Credit check required

🕒 Service Finance — 0% Interest if Paid in Full Within 6 Months

6-month promo starts at installation · Monthly payments required · 10% down required · Interest waived if paid in full before promo expires

🏠 RTO National — Variable APR As Low As 9.99% (Up to 60 Months)

Renters OK · Loans up to \$20,000 · 10% down required

🔑 RTO National Flex Lease — No Credit Check

Select models only · Low deposit · Buildings up to \$20,000 · Perfect for buyers who can't get traditional financing

💡 **Tariff Angle Still Hot:** Lumber hit \$600+/MBF (up 22% in 11 days). 45% tariffs + 1.3B board feet removed from supply. "Today's price is tomorrow's discount" is **still verifiable math** and a closing line that works. Use it

on every Marketplace reply.

PIPELINE FOLLOW-UPS

● ~12 Quoted Leads — Need Follow-Up This Week

Last pipeline data is 6+ weeks stale per records. Easter weekend is "home improvement planning" mode for a lot of buyers. Monday is a prime follow-up window.

TJ: SALESFORCE CHECK

● ~15 Pre-Quote Leads Still Uncontacted

These went cold. With lumber prices climbing and tariff anxiety real, the urgency message is stronger now than when they first inquired. Re-engage with the tariff angle.

REACHOUT TEMPLATE READY

● Shed CRM at backyardbuildingsstl.com/crm/

OCR upload, pipeline board, and source tracking are all built and live. If TJ isn't using it, the data is walking out the door. 5 minutes to log today's pipeline state.

TOOL AVAILABLE

SYSTEMS STATUS

All Green

✅ **Dashboard Status:** Franklin was active at 8 AM on Easter Saturday tasks (Easter FB posts, Monday call sheet, spring copy). All automated crons running. Git main branch active. Last commit: Chief review #312 (8:20 AM).

● Dashboard — Live ✅

tidytails.github.io/tidytails-dashboard/ — all tools accessible. Last push: today 8:20 AM. Serving from main branch (confirmed fix from March 29).

OPERATIONAL

● OpenClaw — v2026.4.2 (d74a122) ✅

Fully up to date. Updated from 2026.4.1 → 2026.4.2 yesterday. All critical CVEs patched. Auth token configured (not in the 63% of vulnerable unauthenticated instances).

UP TO DATE

● SSL Certificate — Valid ✅

tidytailsstl.com SSL valid until May 17, 2026. Reminder set for May 1. Cloudflare handling auto-renewal — should be fine.

VALID UNTIL MAY 17

● Google Search Console — 17 Pages Indexed ✅

Site indexed since March 18. 23 city landing pages deployed. 5 city pages fixed + resubmitted March 26. GBP near-complete (was 7%, now ~95% TJ confirmed).

INDEXED

- **/spring, /calculator, /commercial — Built but Not Deployed ⚠️**

3 high-value pages built months ago, returning homepage on live site. Cloudflare push needed. This is a TJ-only action (30 min).

DEPLOYMENT GAP

- **Blog Gap — Dashboard Showing 78 Posts, Repo Has More**

Chief flagged issue-048 this morning: blog count in dashboard may not match actual deployed posts. Franklin is tracking this — possible dashboard card sync issue.

UNDER REVIEW

NEWS, IDEAS & FRANKLIN'S TO-DO

Fresh Intel

STORY OF THE DAY

Anthropic Leaks Claude Code Source — Second Major Security Lapse in a Week (April 1, 2026)

Anthropic accidentally shipped internal source code inside a Claude Code release — their second public security fumble in 5 days (the first was leaving unreleased model data in a public database). Anthropic confirmed: *"No sensitive customer data or credentials were involved. This was a release packaging issue caused by human error, not a security breach."*

Separately, Anthropic disclosed that a Chinese state-sponsored group had been running a coordinated campaign using Claude Code to infiltrate ~30 organizations (tech companies, banks, gov agencies) before detection.

Why it matters for TJ: The AI tools powering Franklin are facing real-world state-level attacks. Our auth is configured and we're on the latest patched version — but this is a reminder that AI agents accessing personal/business data are a target.

TWO BUSINESS IDEAS FOR THIS WEEK

- **Idea 1: "Spring Cleanup Bundle" — First Visit Free + Lock In Rate**

Easter weekend = the psychological start of backyard season. Run a "first cleanup free" offer through FB groups for 2 weeks. Caveat: must sign up for monthly service. The first visit is marketing cost, not charity. Estimated conversion: 1 in 4 free cleanups → recurring. At \$70/mo, you need 5 converts to recover the cost of 20 free visits.

PROVEN TACTIC (POOP 911 USES IT)

- **Idea 2: "Referral Neighbor Chain" — \$10 off for Each Referral**

Your 11 existing customers know 50+ dog owners. \$10 off their next service for every referral that signs up. Cost per acquisition = \$10 (vs. \$7-15 for FB ads). Customer LTV at \$70/mo = \$840/year. A \$10 acquisition cost is insane ROI. Simple: text each customer, ask for one name.

LOW-COST, HIGH-ROI

4 TASKS FRANKLIN CAN HANDLE THIS WEEK

- **1. Write 5 Easter + Spring FB Group Posts**

Easter Monday is a prime posting day. "The Easter egg hunt went great. The other stuff in your yard? Let's talk." — Franklin drafts, TJ posts. Zero friction.

- 2. Draft Referral Program Text Messages (for Jamie to Send)

Short, conversational texts to all 11 customers asking for one referral. "Hey [name], it's Jamie with Tidy Tails — we're growing and I thought of you first..." Done in 20 min.

- 3. Build Monday Commercial Call Sheet (Top 10 Targets)

Pull top 10 from the 107-lead database, format with name, phone, pitch angle, and objection handlers. One-page, phone-sized. Jamie makes 3 calls, brings back intel.

- 4. Mother's Day Content Brief (April 25 Deadline)

"Give Mom the gift of a clean yard." Mother's Day is May 10. Content takes 2 weeks to gain traction. Franklin drafts full copy package: FB post, ad creative brief, email template. Due April 25.

System Safe

OPENCLAW VERSION CHECK

OpenClaw v2026.4.2 — Fully Up to Date

Current: 2026.4.2 (d74a122) · Updated from 2026.4.1 → 2026.4.2 yesterday. No further update available.

SAFE

CVE STATUS — ALL PATCHED

CVE-2026-33579 — Privilege Escalation (CVSS 8.1–9.8)

Any paired device could silently escalate to full admin. Patched in 2026.3.28. We're on 2026.4.2 — fully covered. Discovered by AntAISecurityLab.

PATCHED ✓

CVE-2026-32922 — Critical Privilege Escalation (CVSS 9.9)

Full instance takeover via device.token.rotate. Patched in 2026.3.11. We were already safe well before public disclosure.

PATCHED ✓

ClawJacked — Localhost WebSocket Hijack

Remote code execution via unprotected WebSocket. Patched in 2026.2.25. Our auth token is configured — not in the vulnerable 63% of unauthed instances.

PATCHED ✓

THIS WEEK'S AI SECURITY NEWS

Anthropic Claude Code Source Code Leak (April 1, 2026)

Internal source code shipped inside a release package. Anthropic confirmed no customer data exposed — classified as human error in packaging, not a breach. Second security incident in 5 days.

MONITOR

Chinese State-Sponsored Group Used Claude Code for Cyberattacks

Anthropic disclosed that a Chinese APT ran a coordinated campaign using Claude Code to infiltrate ~30 organizations (tech, finance, gov) before detection. AI agents as cyberweapons is no longer theoretical.

AWARENESS

RSAC 2026 — AI Attack Trends Dominating Conference

RSA Conference this week focused heavily on agentic AI threats: autonomous attack agents, multi-agent offensive behaviors, and quantum risks. Defense frameworks lagging offense by 12-18 months.

INFO ONLY

63% of OpenClaw Instances Have No Auth Token

Ars Technica (April 3): Security community alarmed by widespread unprotected OpenClaw deployments. Meta banned it from work laptops. Our instance has auth configured — we're in the protected 37%.

WE'RE SAFE

Low Priority: Node.js CVE Verification

CVE-2025-59466 and CVE-2026-21636 recommend Node.js v22.12.0+. We're on v25.5.0 — likely covered, but worth a quick verify when you get a chance.

LOW PRIORITY

✅ **Overall Verdict:** System is patched, protected, and up to date. Auth is configured. All critical CVEs resolved. The broader AI security landscape is getting more intense — but our posture is solid. No urgent action required today.
