1 Mar 31 – Apr 6 Marketplace Ads — Ready to Post

7 ads + 3 IG posts. Tax refund timing, Easter prep, April Fool's garage joke, Q2 fresh start, tariff urgency. File: deliverables/shed-marketplace-ads-mar31-apr6.md

2 Follow Up with Aged Quoted Leads

Anyone quoted 3+ weeks ago with no close. Use the "tax refund + financing" angle — it's timely right now.

3 Fix HTTPS on backyardbuildingsstl.com

SSL may be throwing browser warnings. Costs leads. Priority fix this weekend.

Promo Angle: No major sales discount live right now — but the 6-month no-interest financing is your softclose weapon. "Pay for it with your tax refund, no interest until September." Use this on follow-ups.

TODAY'S STORY

Anthropic Releases Claude Opus 4.6 — Major Upgrade to Agentic AI

Anthropic announced Claude Opus 4.6 in February 2026, calling it an industry-leading model across agentic coding, computer use, tool use, search, and finance — often by wide margins. This matters for Tidy Tails because AI agent capabilities (like Franklin) are getting dramatically more powerful. The gap between businesses that leverage AI-assisted systems and those that don't is about to widen significantly. We're on the right side of that gap — but now is the time to build out more automation (lead response, follow-up sequences, review asks) before competitors catch on.

💡 BUSINESS IDEAS

🚗 **WAXR — Mobile Detailing Marketplace (Already in Motion)**

You're already working on this — \$1.5M seed target, 6 of 10 competitors dead, only 2 real rivals with no AI quality verification. The differentiator is the QA layer. Clean up waxr.io ("WARX" typo still live), nail the pitch deck, and get in front of angels. Your competitor intel is solid — full report at deliverables/waxr-competitive-intel-march25-2026.md.

🐾 **Pet Waste Franchise / White-Label System**

Once you hit 25+ customers, you'll have a proven playbook — CRM, website, SEO, content, event strategy, ad templates. Package it as a franchise or white-label toolkit for pet waste operators in other cities. Low cap-ex, mostly digital assets. You're building the system anyway — may as well monetize it. Charge \$2,500-5,000 upfront + rev share or monthly license.

🔧 TASKS FRANKLIN COULD HANDLE

- **Automated Review Request Sequence**

— After each service, auto-text the customer 24 hours later with the review link. Zero effort from Jamie. Could add 2-3 reviews/month on autopilot.
- **Competitive Price Monitoring**

— Weekly scrape of Poop 2 Scoop, No. 2 Crew, and Dog Doody Defenders for pricing and offer changes. Get an alert if a competitor starts something new before you see it in the market.
- **Marketplace Ad Scheduling**

— Build a system to draft next week's shed Marketplace ads automatically each Saturday morning, pulling from TJ's style guide + current promos. TJ reviews, tweaks, posts in 5 min.
- **Monthly Revenue Dashboard**

— Pull customer count, revenue, review count, and website traffic into a one-page dashboard auto-generated on the 1st of each month. Tracks trends so we can spot problems before they compound.

REVIEW

OPENCLAW VERSION CHECK

Installed Version	2026.3.24 (CFF6DC9)
Latest Release (GitHub)	2026.3.25
Status	⚠️ 1 VERSION BEHIND

Update Available: OpenClaw 2026.3.25 released March 25. You're on 2026.3.24. The new release adds Microsoft Teams SDK migration, OpenAI-compatible /v1/models and /v1/embeddings endpoints, and improved agent tool visibility. No critical security CVEs in the release notes, but staying current is best practice. Run `npm update -g openclaw` or use the gateway update tool to patch.

SECURITY INTELLIGENCE

Brave Search API Quota Exhausted (2000/2000): Live threat searches for "OpenClaw security vulnerability," "Claude Anthropic security," and "AI agent security news" were blocked by the 429 rate limit. No threat data retrieved this morning. Recommend upgrading the Brave Search plan or rotating to a secondary search API (DuckDuckGo, Serper.dev) so security scans aren't blind.

Anthropic Model Update: Claude Opus 4.6 released Feb 2026. No security vulnerabilities disclosed. Anthropic continues Claude's Constitutional AI safety approach. No action required on your end — Franklin runs on Sonnet 4.6 and is current.

Local System: No abnormal processes, cron jobs firing normally, workspace files intact. Agent memory and skill files verified readable. No suspicious activity detected in this session.

REQUIRED ACTIONS

- **Update OpenClaw to 2026.3.25** — 1 version behind, includes Teams SDK + compatibility improvements
- **Upgrade Brave Search plan** — 2000-query free tier is exhausted. Security scans are blind without it. \$3/mo for the Basic plan unlocks 2000/mo again.
- **Run openclaw healthcheck** — Full security audit of host machine. Checks SSH config, firewall, auto-updates, open ports.
