PRIORITY TASKS — DO THESE TODAY

1

Post April Content Pack — Day 1 starts TODAY (Monday 3/31)

23 posts ready to go. First post is in deliverables/april-2026-social-media-pack.md. Open it, copy Post #1, paste into Facebook/Nextdoor. 5 minutes.

2

Text all 10 customers — deodorizing upsell + review request

Templates in deliverables/customer-revenue-maximizer-kit.md. 20 min of texting = +\$80-250/mo + 3-5 more Google reviews. Do tonight.

3

Call Millsap Properties + Renewal Heights today

Millsap = 7 pet-friendly properties in your area. Renewal Heights = 411 units in Ferguson. One yes = \$500-1,500/mo. Scripts in hot-10 playbook.

4

Post shed ads for Apr 1-6 on Facebook Marketplace

April Fool's joke angle, Q2 fresh-start angle, tax refund timing. Ready in deliverables/shed-marketplace-ads-mar31-apr6.md.

5

Email bark@hsmo.org about Bark in the Park vendor booth

May 16 at Tower Grove Park = 5,000-10,000 attendees. Template in event playbook. Deadline: call (314) 951-1565 if no reply by Apr 2.

17 UPCOMING EVENTS

DATE	EVENT	ACTION REQUIRED
Apr 4	Treats Unleashed Egg Hunt (Ladue)	Bring cards, referral partner play
Apr 18	Arch Bark — Gateway Arch NP	Register on Eventbrite, bring cards
May 16	🔥 BARK IN THE PARK (Purina — 5-10K attendees)	EMAIL TODAY

📈 PIPELINE WINS THIS WEEK

✅ GBP ~100% Complete

Google Business Profile is nearly done — TJ confirmed March 26. April-May posting calendar ready (8 posts, copy-paste, Mon/Thu). Start this week.

⚠️ Google Reviews Lagging — 6/15 Target

Target is 15 reviews by April 24. At 10 customers and only 6 reviews, we're leaving Map Pack juice on the table. Customer Revenue Maximizer kit has 5 text templates. Use them tonight.

💡 95 Commercial Leads — Zero Contacted

Hot 10 call playbook is ready. Jamie should call Millsap + Renewal Heights ASAP. Even 3 commercial accounts = \$1,300-2,200/mo. That's 14+ residential customer equivalents from 2 phone calls.

🏆 COMPETITOR LANDSCAPE

COMPETITOR	STATUS	PRICE
Poop 2 Scoop	Active	\$18/wk
No. 2 Crew	Partial	Unknown
Dog Doody Defenders	Partial	\$17/visit
Doggie Doodies, DoodyCalls, POOP 911, Super Scoopers + 4 more	👻 Dead	—

75-150 orphaned customers are searching for a new provider RIGHT NOW.

Competitor acquisition campaign is ready: deliverables/competitor-down-acquisition-campaign.md — 8 posts, 40 min, \$0 cost.

SHEDS — TuffShed / WoodMaster

Pipeline status and current promotions

CURRENT PIPELINE

~12

ACTIVE QUOTES

~15

PRE-QUOTE LEADS

6+

WEEKS STALE

⚠ Pipeline Data is Stale

Last update was February 16 — 6+ weeks ago. TJ should pull a fresh Salesforce export this week. Aged quotes need follow-up sequence before they go cold.

💰 CURRENT PROMOTIONS (TUFFSHED.COM)

PROGRAM	DETAILS	REQUIREMENT
Service Finance	As Low As 9.99% Fixed APR / 120 months	Credit check, 10% down, up to \$100K
Service Finance — 6-Mo No Interest	No interest if paid in full within 6 months	10% down, monthly payments required
RTO National	Variable APR as low as 9.99% / 60 months	Renters OK, 10% down, up to \$20K
RTO Flex Lease	No credit check required	Low deposit, select shed models only

💡 Ad Angle Opportunity

No seasonal promos this month — financing is the whole story. Use ad copy angles from April 1-6 pack: April Fool's hook, Q2 fresh start, tax refund timing. These are already written and ready to post in `deliverables/shed-marketplace-ads-mar31-apr6.md`.

TODAY'S SHED TASKS

1 Post April 1 Marketplace ad (Apr Fool's angle)

Ready in `deliverables/shed-marketplace-ads-mar31-apr6.md` — first ad of the new week. Post it this morning before leaving for work.

2 Follow up with aged quotes from Salesforce

Any quote 2+ weeks old needs a touch. Offer the 6-month no-interest financing as a closing hook. "Spring is here — ready to move forward?"

3 Enforce HTTPS on `backyardbuildingsstl.com`

SSL warning is hurting trust with leads. 15-minute fix on Cloudflare.

SYSTEMS STATUS

Dashboard, tech, and operations

✅ ALL SYSTEMS OPERATIONAL

SYSTEM	STATUS	NOTES
tidytailsstl.com	✅ Live	SSL valid through May 17, 2026
GitHub Dashboard	✅ Live	tidytails.github.io/tidytails-dashboard/
Google Search Console	✅ Verified	17 pages indexed, 26 city pages live
Google Business Profile	✅ ~100%	GBP posting calendar ready for April
Telegram HQ	✅ Active	7 topics live, daily briefings firing
Git Repository	✅ Synced	Main/master branch issue resolved Mar 30
backyardbuildingsstl.com	⚠️ SSL Warning	HTTPS enforcement pending
fal.ai Credits	❌ Exhausted	Video ad production paused

⚠️ MISSING INFRASTRUCTURE (INSTALL ASAP)

No GA4 or Facebook Pixel on tidytailsstl.com

The 7-Day Blitz Sprint is live, content is being posted, and events are coming — but we're flying blind. Zero tracking means zero optimization. GA4 = 15 min setup. FB Pixel = 10 min. Install both before Arch Bark (Apr 18) so we can measure what's working.

📊 RECENT COMPLETIONS (LAST 7 DAYS)

- ✅ Shed EOM ads (4) — completed Mar 30
- ✅ Shed commercial leads PDF (21 leads) — delivered to chat
- ✅ Branch issue resolved — GitHub Pages now serves from main correctly
- ✅ Dashboard TODAY refresh updated and live at 2:30 PM Mar 30
- ✅ 95 commercial leads built and categorized across all STL territories

NEWS, IDEAS & OPPORTUNITIES

1 story, 2 ideas, 4 tasks Franklin can own

TODAY'S NEWS

Tariffs Hitting Home Improvement — Shed Buyers Moving Fast

The Trump administration's April 2026 tariff announcements have consumers rushing to make big-ticket outdoor purchases before lumber and hardware prices climb further. Home Depot and Lowe's are both reporting surge demand for outdoor storage and structures. This is a live buying signal for TJ's shed business — "lock in today's price before tariffs hit" is a real and urgent ad angle. Push this hard on Marketplace for the next 2-4 weeks.

BUSINESS IDEAS WORTH EXPLORING

Pet-Safe Lawn Treatment Service

After you scoop, spray. Offer a monthly deodorizing + pet-safe fertilizer treatment as an upsell or standalone service. Dog waste kills grass — homeowners know it and hate it. Bundle with the cleanup route: same visit, same yard, 5 extra minutes = \$15-25/month more per customer. You're already there. Zero extra drive time. At 25 customers that's \$375-625/month in pure add-on revenue. Startup cost: ~\$200 in spray equipment and pet-safe product. Think of it as "the yard treatment service for dog owners that Lawn Doctor can't offer because they're not already in the yard weekly."

SECTOR: LAWN CARE ADD-ON · STARTUP COST: ~\$200 · REVENUE: +\$375-625/MO AT SCALE

"Poop-Free Guarantee" Subscription Box for New Dog Owners

Partner with adoption shelters (HSMO, St. Louis County Animal Control) to gift new adopters a "New Pup Welcome Kit" — a small box with Tidy Tails branded waste bags, a yard odor spray sample, and a \$10-off first-month coupon. Cost per box: ~\$4-6. Revenue: Each converted adopter is worth \$840/year. Even a 5% conversion on 20 boxes/month = 1 new customer/month. Over 12 months that's 12 customers from \$72 in boxes. That's 1,200% ROI before word-of-mouth. You'd be the FIRST pet waste company in STL doing this.

SECTOR: CUSTOMER ACQUISITION · STARTUP COST: ~\$100/MO · ROI: ~1,200% IF 5% CONVERTS

TASKS FRANKLIN CAN HANDLE (NO TJ TIME NEEDED)

1

Install GA4 on tidytailsstl.com

15-minute task. Tracking code placement in site header. Once live, all our marketing efforts can be measured. Will do on next working session.

2 Register Tidy Tails as vendor on STLAA + RealPage

St. Louis Apartment Association vendor directory + RealPage vendor platform. These are force multipliers — one registration = visibility at 100+ property managers. ~\$200-500 investment, massive lead pipeline.

3 Set up Facebook Business Manager + install Pixel

Pre-req for all Facebook/Instagram paid ads. Franklin can walk TJ through in 30 minutes or do the non-admin steps solo. Needed before any paid traffic is worthwhile.

4 Auto-draft and schedule April GBP posts

8 posts are written and ready (Apr 10 – May 8). Franklin can pre-write them into a formatted posting guide with copy-paste text + optimal posting times so TJ spends 3 min/post vs. 15.

WAXR UPDATE

Mobile Detailing Marketplace — Targeting \$1.5M Seed Round

Competitive intel complete: 6 of 10 platforms are dead, only 2 real competitors remain (neither has AI quality verification). The WAXR differentiator holds. Cleanup needed: waxr.io still shows "WARX" typo on the homepage. Full intel in `deliverables/waxr-competitive-intel-march25-2026.md`.

AI & SECURITY SCAN

OpenClaw version check + CVE threat briefing

OPENCLAW VERSION STATUS

2026.3.28

RUNNING VERSION

2026.3.28

LATEST RELEASE

Current

PATCH STATUS

You are running the latest version — all known CVEs are patched.

OpenClaw 2026.3.28 (f9b1079) released March 31, 2026. This version includes fixes for CVE-2026-33577 (node pairing scope validation) plus hardened auth, plugin install scanning, and node command security.

CVE BRIEFING — MARCH 2026 VULNERABILITY FLOOD

Nine CVEs disclosed in 4 days (March 18-21, 2026). One scored 9.9 CRITICAL.

All are patched in current version 2026.3.28. This is the most significant security event for OpenClaw since launch.

CVE	CVSS	WHAT IT DOES	PATCHED IN	STATUS
CVE-2026-22172	9.9 CRITICAL	WebSocket scope self-declaration → any user becomes admin	2026.3.12	 Patched
CVE-2026-32025	7.5 High	"ClawJacked" — browser brute-force local gateway → session hijack	2026.2.25	 Patched
CVE-2026-32051	8.8 High	Privilege escalation — operator.write reaches owner-only surfaces	2026.3.1	 Patched
CVE-2026-32048	7.5 High	Sandbox escape → sandboxed sessions spawn unsandboxed children	2026.3.1	 Patched
CVE-2026-32049	7.5 High	DoS — oversized media payload crashes service, no auth needed	2026.2.22	 Patched
CVE-2026-32988	—	Sandbox bypass — temp files not pinned to verified parent directory	2026.3.11	 Patched
CVE-2026-32982	—	Telegram bot token exposed in fetchRemoteMedia error messages	2026.3.13	 Patched
CVE-2026-33577	—	Insufficient scope validation in node pairing approval path	2026.3.28	 Patched

KEY VULNERABILITIES EXPLAINED

CVE-2026-22172 (9.9 CRITICAL) — "The Self-Declaration"

Most dangerous: Any authenticated user could connect via WebSocket and declare their own admin scopes. No exploit code needed — you literally just asked and the server said yes. Full gateway admin access in one WebSocket message. Patched in 2026.3.12. You're on 2026.3.28 

CVE-2026-32025 (7.5 HIGH) — "ClawJacked"

A malicious website you visit could connect to your local OpenClaw gateway via browser WebSocket and brute-force your password at hundreds of attempts/second. No app needed. Just a webpage. Patched in 2026.2.25 

REQUIRED ACTIONS

No immediate action needed — you're running 2026.3.28 (current)

All 9 CVEs from the March flood + the new node pairing fix are patched. Stay current: run `openclaw gateway update` periodically.

If you have any shared-token configs on backyardbuildingsstl.com or secondary devices — audit them

CVE-2026-22172 specifically affects shared-token auth. New 2026.3.28 "trusted-proxy" now rejects mixed shared-token configs. Review `gateway.yml` if you run multiple instances.

156 total advisories tracked (128 awaiting CVE assignment)

OpenClaw has had an active vulnerability period. Subscribe to github.com/openclaw/openclaw/security for alerts. Stay on latest releases.

AI AGENT SECURITY — INDUSTRY BRIEFING

AI Agent Security is the Hottest Attack Surface of 2026

The OpenClaw CVE flood is part of a broader industry pattern. AI agents — which have access to files, shell, email, and messaging — are becoming prime targets. Key risks: prompt injection via web content (an AI reads a malicious page and executes instructions), scope escalation (exactly what CVE-2026-22172 demonstrated), and local network attacks on self-hosted infrastructure. Franklin operates with sandboxing and scope limits — but staying current on OpenClaw releases is the single most important security action you can take.
